Advanced-Engineered (A-E) headers are an economical alternative to LSL for your door and window header applications and are manufactured right here in Arizona.

In addition to common 3-1/2" wide members, our A-E headers are also available in 5-1/2" widths to flush out your 2x4 and 2x6 walls without the hassle of multiple built-up members and shimming.

All sizes can be manufactured in both 1.4E and 1.6E grades, so we can design your projects to use materially more efficiently and you pay for only the strength you need.

Product is also available in traditional glu-lam beam sizes and camber can be specified if desired.

- **Features:**
- Dimensional consistency
- Superior strength to cost ratio
- Flush 2x4 AND 2x6 wall applications
- Long length or PET availability
- Code compliant and grade stamped
- Independent, third party quality control inspection by APA
